Executive Summary

GTS, Inc. (GTS) recently conducted a Phase I Environmental Site Assessment (ESA) of an approximately 6.7-acre parcel of undeveloped farmland nominally located at 3299 E US 412 in Siloam Springs, Arkansas. The property comprises a single parcel of vacant commercial land located in-between a Walmart store and a Lowe's store. The rectangular property is presently an undeveloped field.

The Phase 1 ESA was prepared for Burk Collins Company, Hurst, Texas. The ESA was conducted in general conformance with ASTM Standard E 1527-21 and U.S. Environmental Protection Agency's *Standards and Practices for All Appropriate Inquiries (AAI)*, 40 CFR Part 312.

The property was visually inspected on July 19, 2022 for evidence of recognized environmental conditions (RECs)¹; controlled RECs (CRECs)²; and historical RECs (HRECs)³. In addition, certain non-ASTM scope ESA items that may also pose business environmental risks were also evaluated.

The site was evaluated first-hand by walking around and throughout the 6.7-acre property and noting current ground conditions. Photographs were taken to document the visual site inspection. No RECs were identified on the vacant commercial property during the site reconnaissance.

As part of the records research, historical aerial photographs, topographic maps, and environmental regulatory databases were examined. Based on this review, it is evident that the property has historically been used for farming, and has remained commercially undeveloped to date.

The target property was not listed in any of the standard environmental databases searched. Ten facilities located within one mile of the target property were listed in the environmental databases.

The environmental database listings are considered routine in nature, associated with the registration and permitting of underground and aboveground petroleum storage tanks, and standard RCRA hazardous waste reporting requirements at local businesses.

According to government records, no environmental issues are present at the listed facilities, and they are presently in compliance with applicable ADEQ and EPA environmental regulations. Thus, none of the listed facilities represents a REC for the vacant target property.

Based upon the findings of the Phase 1 ESA, GTS considers the 6.7-acre undeveloped property, nominally located at 3299 E US 412 in Siloam Springs, Arkansas, to be unencumbered by RECs.

¹ REC is defined by ASTM as 'the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment'.

² CREC is defined by ASTM as 'a recognized environmental condition resulting from the past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls'.

³ HREC is defined by ASTM as 'a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority, or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls'.

1.0 Introduction

This Phase I Environmental Site Assessment (ESA) was performed by GTS, Inc. (GTS) to identify and evaluate potential Recognized Environmental Conditions (RECs) for a 6.7-acre commercial property located at the terminus of 3299 E US 412 in Siloam Springs, Arkansas.

The protocol used for the ESA complies with the requirements of the American Society for Testing and Materials (ASTM) Standard E 1527-21 and the U.S. Environmental Protection Agency's (EPA) *Standards and Practices for All Appropriate Inquiries (AAI)*, 40 CFR Part 312.

An REC is defined by ASTM as *'the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment'*. The term is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

The ESA also evaluated certain non-ASTM scope ESA items that may also pose business environmental risks, such as asbestos containing materials (ACM), lead-based paint (LBP), radon zone characterization, regulatory compliance, historic and cultural resources, endangered species, wetlands, and floodplains.

1.1 Purpose and Scope

The purpose of a Phase I ESA is to identify existing or potential RECs that may constitute or result in a violation of applicable environmental laws; impose constraints on operations at the property; require remediation of hazardous substances or petroleum products; affect the value of the property; or require additional action with respect to such conditions.

The client/user is performing this ESA to satisfy one of the requirements to qualify for the ***bona fide prospective purchaser*** limitations on CERCLA liability; that is, to make *"all appropriate inquiry* into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B).

The scope of the Phase 1 ESA comprises five components:

- Site Reconnaissance
- Environmental Records and Database Searches
- Knowledgeable Person Interviews (if available)
- Environmental Risk Consideration
- Phase 1 ESA Report Preparation

The appendices to the ESA report include a site location plan, site photographs, historical aerial photographs, historical topographic maps, Sanborn Fire Insurance maps, local City Directory abstracts, and the results of local, state, and federal environmental database search enquiries.

This assembled material provides the documentation to support the analysis and conclusions presented in the Phase I ESA Report.

1.2 Authorization and Access

The Phase 1 ESA was authorized by Burk Collins Company, Hurst, Texas. Access to the open roadside property was unrestricted.

1.3 Warranty for Phase 1 ESA

GTS warrants that the findings and conclusions contained herein were reached in accordance with the methodologies set forth in the applicable ASTM E 1527-21 Standard and EPA AAI rules. These methodologies are described by the standard as representing good commercial and customary practice for conducting a Phase 1 ESA of a parcel of property for the purpose of identifying RECs. However, these findings and conclusions contain all of the limitations inherent to the methodologies which are referred to in the standard and some of which are more specifically set forth below.

1.4 Limitations and Exceptions

The accuracy and completeness of this report are necessarily limited by the following conditions:

- a) There is a possibility that, even with proper application of the standard methodologies, there might exist on the target property conditions that could not be identified within the scope of the assessment or which were not reasonably ascertainable from the available information. GTS believes that the information obtained from the record review and the interviews (where available) concerning the site is reliable. However, GTS cannot and does not warrant or guarantee that the information provided by these or other sources is accurate or complete. The methodologies of the ESA are not intended to produce all-inclusive or comprehensive results, but rather to provide the client with readily available information regarding the potential presence of RECs relating to the target property.
- b) This Phase 1 ESA was non-invasive in nature and sampling of air, water, sediment, and soil was not part of the scope of this assessment. Consequently, opinions and conclusions concerning the possible presence of heavy metals, petroleum hydrocarbons, polychlorinated biphenyls (PCBs), or other regulated hazardous substances at the target property are based on readily available published information, personal interviews, and the site-specific features noted during the site reconnaissance.

1.5 User Reliance

This Phase I ESA Report is certified to, can be relied upon by, and has been prepared for the exclusive use of the following entity:

- Burk Collins Company, Hurst, Texas

The named entity may not convey this report to an affiliate, related entity, subsidiary, lender, title insurer, regulatory/city agency or current property owner(s) or their agents without written consent from GTS.

2.0 Site Description

A brief description of the target property is provided below. The site location may be seen on the site location plan in Appendix A-1, and photographs of the site features are provided in Appendix B-1.

2.1 Site Location

The target property is nominally located at 3299 E US 412 in Siloam Springs, Benton County, Arkansas. The vacant commercial property sits north of US 412 and west of N Progress Avenue, in-between a Walmart store and a Lowe's Hardware store.

According to Google Earth, the property latitude is 36° 11' 00", and the longitude is 94° 30' 38".

2.2 Site Characteristics

The rectangular target property occupies 6.7-acres of farmland approximately 400 feet north of US 412. Aerial photographs show that the vacant property has historically been used as farmland.

The property is generally flat-lying, with ground elevations ranging between 1250 and 1255 feet above mean sea level across the site. There are no streams, ponds, or other surface water features present, and there are no structures on the vacant property.

2.3 Current and Previous Land Use

The target property is currently a vacant field. The property has historically been used for agriculture.

3.0 User Provided Information

3.1 Title Records

The target property has the following Benton County Tax ID number:

- 03-03441-001 (6.66 acres)

The property is owned by Cole Properties, LLLP, and the land-use is "Commercial – Vacant Land".

3.2 Specialized Knowledge

GTS has no prior specialized knowledge of the target property.

4.0 Records Review and Database Search

Environmental Data Resources, Inc. (EDR) was subcontracted by GTS to research and provide information from available standard federal and state environmental records and databases regarding the target property and surrounding properties within a one-mile radius of the site. The EDR database search satisfies ASTM Standard E-1527-21 for a government records review to be used in a Phase I ESA.

Regulatory information was obtained and reviewed from the following principal sources:

- Arkansas Department of Environmental Quality (ADEQ)
- U.S. Environmental Protection Agency (EPA)
- National Technical Information Service (NTIS)
- U.S. Coast Guard National Response Center (USCG-NRC)
- U.S. Department of Transportation (USDOT)
- Nuclear Regulatory Commission (NRC)

- U.S. Department of Labor, Mine Safety and Health Administration (MSHA)
- U.S. Geological Survey (USGS)
- Federal Emergency Management Agency (FEMA)
- U.S. Department of Agriculture (USDA) Soil Conservation Service (SCS)
- U.S. Fish and Wildlife Service (USFWS).

The following table lists the databases searched and highlights those databases where facilities within 1-mile, one-half mile, or one-quarter mile of the target property are listed. Please see Appendix C-4.

Summary of Records Reviewed and Databases Searched

5.0 Physical Site Setting

The current setting for the target property was characterized during the July 19, 2022 site reconnaissance. To help understand changes to the property over time, historical aerial photographs and USGS topographic maps were reviewed.

Accordingly, ten aerial photographs (from 1968 to 2017) and seven topographic map sets (from 1899 to 2020) were evaluated. Based on this review, it is evident that the undeveloped target property has historically been used for farming.

The USDA Soil Conservation Service manages the National Cooperative Soil Survey (NCSS) for privately owned lands in the United States. According to NCSS, the property is located on either the *Jay* soil component, a moderately well-drained, partially hydric, silt loam with slow infiltration rates.

Please see Appendix C-4, Radius Map, pp. 129-130 for further details.

6.0 Historical Site Land Use

6.1 Aerial Photographs

To obtain information about the past use of the site and adjacent properties, aerial photographs from 1968, 1976, 1980, 1989, 1994, 2001, 2006, 2010, 2013, and 2017 were reviewed for the target property.

Unfortunately, the resolution and scale of the available aerial photographs precludes ready identification of site-specific features. Nonetheless, it is evident that that property has been used for farming since at least 1968.

Please see Appendix B-2 for copies of the aerial photographs.

6.2 Topographic Maps

Seven historical topographic maps for the area were reviewed, consisting of USGS quadrangle maps for Fayetteville (1899, 1901), Siloam Springs, and Gallatin (1970, 1982, 2014, 2017, and 2020). Unfortunately, the small scale of the maps prevents useful identification any site-specific environmental features.

Please see Appendix C-1 for copies of the topographic maps.

6.3 Sanborn Fire Insurance Maps

Sanborn Fire Insurance Maps were not available for the rural target property. Please see Appendix C-2.

6.4 City Directory Information

As part of the database searches, local City Directory records were investigated. Street addresses from 1992 to 2017 were provided by the EDR Digital Archive.

According to the records provided, the vacant, undeveloped target property in-between Walmart and Lowe's has never been assigned a formal street address.

Please see Appendix C-3 for the City Directory records.

6.5 Data Gaps

No relevant environmental data gaps were identified during the Phase 1 ESA process.

7.0 Site Reconnaissance

GTS conducted a site reconnaissance on July 19, 2022 to evaluate the potential existence of RECs at the target property. The site reconnaissance consisted of a visual site inspection accomplished by systematically walking around the perimeter and throughout the vacant property to evaluate the potential presence of RECs.

Common RECs include underground storage tanks, aboveground storage tanks, hazardous materials storage areas, hazardous waste storage areas, stained ground, stressed vegetation, and PCB-containing electrical transformers. In addition, the land-use surrounding the property was also noted.

Photographs were taken to document the key features of the target property, the surrounding properties and adjacent land-use, and the potential presence of RECs (please see Appendix B-1).

7.1 Visual Site Inspection (Onsite)

In addition to general observations concerning the physical site conditions, the property was inspected for the following specific features that commonly constitute RECs at commercial properties.

Underground Storage Tanks (USTs)

No USTs were present on the property during the site inspection.

Aboveground Storage Tanks (ASTs)

No ASTs were present on the property during the site inspection.

Hazardous Material Storage Areas

No hazardous material storage areas were observed at the property.

Hazardous Waste Storage Areas

No hazardous waste storage areas were observed at the property.

PCB-containing Electrical Transformers

The property was inspected for evidence of electrical transformers that might contain PCBs. PCBs were domestically manufactured between 1929 and 1979, when EPA banned the manufacture of PCBs.

Regulation 40 CFR Section 761 states, in part, that an owner of equipment contaminated with PCBs (i.e., transformers containing > 160 parts per million PCBs) is responsible for any environmental liabilities caused by PCB contamination through leakage, fires, etc.

No PCB-containing electrical transformers were found on the undeveloped former farm property at the time of the site inspection.

Stained Ground

No areas of stained ground indicative of potential chemical releases were visible on the property.

Stressed Vegetation

No areas of stressed vegetation were noted at the time of the site inspection.

Surface Water Drainage and Retention Ponds

The target property is generally flat-lying and no streams, ponds, or other surface water features were seen on the undeveloped property during the site inspection.

Dumping Grounds and Landfills

No evidence of dumping grounds or landfills was seen on the property during the site inspection.

Groundwater Wells

Well searches indicate that there are no Public Water Supply wells within a mile of the target property. There is one USGS well and two state-registered wells located within one mile of the target property.

The USGS well is located on half-mile north of the property and drilled to a depth of 2236 feet; the two state-registered wells are located south of the property and are 1156 feet deep and 460 feet deep.

Please see Appendix C-4, Radius Map, pp. 134-135.

7.2 Visual Site Inspection (Offsite)

GTS also conducted a brief offsite visual inspection of surrounding properties that were readily accessible from the target property.

Land-use in the vicinity of the target property today is primarily commercial, particularly alongside Hwy 412. Several agricultural properties lie farther north of US 412, and new residential developments are located farther south of US 412.

The following table summarizes the offsite REC observations for the target property. No RECs were observed in the vicinity of the undeveloped commercial property.

Summary of Offsite REC Observations

OFFSITE ITEMS	NOT OBSERVED	OBSERVED	DISCUSSED
USTs	X		
ASTs	X		
Hazardous Material Storage Areas	X		
Hazardous Waste Storage Areas	X		
PCB-containing Electrical Transformers	X		
Stained Ground	X		
Stressed Vegetation	X		
Surface Water Drainage and Retention Ponds	X		
Dumping Grounds and Landfills	X		
Groundwater Wells	X		

7.3 Knowledgeable Person Interviews

There were no knowledgeable persons available for interview at the time of the site reconnaissance.

8.0 Results of Records Review and Database Search

The target property was not listed in any of the standard environmental databases searched. Ten facilities located within one mile of the target property were listed in the environmental databases. The following table summarizes the environmental database search results provided by EDR.

Listed Facilities within 1-mile of Target Property

NAME	ADDRESS	MILES	DATABASE
LOWE'S OF SILOAM SPRINGS	3499 HWY 412 E	0.06	RCRA-SQG/AST
WALMART SUPERCENTER	2901 HWY 412 E	0.09	RCRA-VSQG/FINDS/ECHO
COBB VANTRESS HATCHERY	HWY 68 E	0.11	UST/PERMITS
TRACTOR SUPPLY COMPANY	3480 HWY 412 E	0.14	RCRA VSQG
MURPHY USA #6647	2895 HWY 412 E	0.15	UST/PERMITS
FAST TRAX #8	2730 HWY 412 E	0,18	UST/PERMITS
PHILLIPS 66 COMPANY	ST 68 & 16	0.19	UST/PERMITS
ROBERTSON OIL COMPANY	HWY 68 & 16	0.20	UST/PERMITS
CASEY'S GENERAL STORE	2655 HWY 412 E	0.23	UST
CARNEY'S 412 AUTO	3680 HWY 412 E	0.28	LTANKS/UST/PERMITS

Note: RCRA-SQG = RCRA small quantity generator; RCRA-VSQG = RCRA very small quantity generator; FINDS = facility index system; ECHO = environmental compliance history; AST = aboveground storage tank; UST = underground storage tank; PERMITS = permit data system; LTANKS = leaking storage tank locations

The environmental database listings are considered routine in nature, associated with the registration and permitting of underground and aboveground petroleum storage tanks, and standard RCRA hazardous waste reporting requirements at local businesses (see above).

According to government records, no environmental issues are present at the listed facilities, and they are presently in compliance with applicable ADEQ and EPA environmental regulations. Thus, none of the listed facilities represents a REC for the undeveloped target property.

Please see Appendix C-4, Radius Map, pp. 4-19 for further details.

9.0 Non-Scope ESA Considerations

The site reconnaissance also investigated the target property for the potential presence of commonly occurring but non-ASTM-scope ESA items such as asbestos containing materials, lead-based paint, radon zone characterization, regulatory compliance, historic and cultural resources, endangered species, wetlands, and floodplains.

These items, if present, may constitute business environmental risks and thus were also evaluated as part of the Phase 1 ESA scope.

9.1 Asbestos-containing Materials (ACM)

Asbestos is a general term applied to a wide variety of naturally occurring fibrous minerals. Because asbestos is strong, incombustible, and corrosion resistant, it was widely used in buildings constructed prior to 1978.

Asbestos may be present in roofing shingles, ceiling and floor tiles, paper products, friction products, and heat-resistant materials and coatings. These products are referred to as asbestos-containing materials or ACM.

In 1973, EPA banned spray-applied surfacing ACM used for fireproofing and insulation. In 1975, EPA banned installation of asbestos pipe and block insulation. Then, in 1978, EPA banned spray-applied surfacing ACM for purposes not already banned in the 1973 regulation.

When inhaled in sufficient quantities, asbestos fibers can cause serious health problems; asbestos is one of the few substances proven to be a carcinogen. For these reasons, federal, state, and local governments regulate the use of and removal of ACM.

Because there are no structures on the property, there is no potential for ACM to be present onsite.

9.2 Lead-based Paint (LBP)

Because there are no structures on the property, there is no potential for LBP to be present onsite.

9.3 Radon Zone Characterization

Radon is an invisible, odorless, radioactive gas produced by the decay of uranium in rock and soil. Radon gas enters a building through cracks in the foundation and walls. Buildings with basements and concrete slab foundations are more susceptible to elevated radon gas levels.

Radon is measured in picocuries per liter of air (pCi/L). The EPA-recommended safe radon level is considered to be 4 pCi/L. EPA classifies recommended radon levels based on three zones:

- Zone 1: indoor average level > 4 pCi/L
- Zone 2: indoor average level > 2 pCi/L and < 4 pCi/L
- Zone 3: indoor average level < 2 pCi/L

The target property is located in Benton County, Arkansas. The EPA Radon Zone for Benton County is designated 2 which corresponds to the intermediate range of EPA-predicted radon concentrations.

Federal air monitoring test results for 7 locations within Benton County Zip Code 72761 indicate that 86% of first floor living areas displayed radon concentrations of less than 4 pCi/L.

Please see Appendix C-4, Radius Map, p. 137 for further details.

9.4 Regulatory Compliance

No regulatory compliance issues were apparent on the property at the time of the site reconnaissance.

9.5 Historic and Cultural Resources

Because of the long history of agricultural land-use at the property, it is considered unlikely that any significant historic and cultural resources are present today onsite.

9.6 Endangered Species

Because of the long history of agricultural land-use on the property, and considering the absence of streams, ponds, and mature woods onsite, there is a *de minimis* likelihood that listed endangered species presently inhabit or use the limited natural resources available at the target property.

9.7 Wetlands

No wetlands were present on the property at the time of the site reconnaissance. According to USFWS' National Wetlands Inventory (NWI), two freshwater ponds are shown within a quarter-mile radius of the target property (although the ponds may no longer exist because of recent commercial developments).

Please see Appendix C-4, p 13.

9.8 Floodplains

According to FEMA's Flood Insurance Rate Map (FIRM) for the target property (Panel 05007C0435J), the property does not lie within a 100-year flood zone.

Please see Appendix C-5, FEMA FIRMette Flood Zone Map.

10.0 Summary and Conclusions

GTS recently conducted a Phase I ESA of an approximately 6.7-acre parcel of land located at the terminus of 3299 E US 412 in west Siloam Springs, Arkansas. The former farm property was initially cleared of vegetation and re-graded in 2005 and is currently still vacant and undeveloped.

The Phase 1 ESA was prepared for Burk Collins Company, based in Hurst, Texas. The vacant 6.7-acre commercial property was visually inspected on July 19, 2022 for potential evidence of RECs and certain non-ASTM ESA items that may pose environmental business risks.

The site was evaluated first-hand by walking around and throughout the 6.7-acre commercial property and noting current ground conditions. Photographs were taken to document the visual site inspection. No RECs were identified on the undeveloped property during the site reconnaissance.

As part of the records research, historical aerial photographs, topographic maps, and environmental regulatory databases were examined. Based on this review, it is evident that the property has historically been used for farming, and has remained commercially undeveloped to date.

The target property was not listed in any of the standard environmental databases searched. Ten facilities located within one mile of the target property were listed in the environmental databases.

The environmental database listings are considered routine in nature, associated with the registration and permitting of underground and aboveground petroleum storage tanks, and standard RCRA hazardous waste reporting requirements at local businesses.

According to government records, no environmental issues are present at the listed facilities, and they are presently in compliance with applicable ADEQ and EPA environmental regulations. Thus, none of the listed facilities represents a REC for the vacant target property.

Based upon the findings of the Phase 1 ESA, GTS considers the 6.7-acre undeveloped farm property, nominally located at 3299 E US 412 in Siloam Springs, Arkansas, to be unencumbered by RECs.

11.0 Signature of Environmental Professional

I declare that, to the best of my professional knowledge and belief, I meet the definition of *Environmental professional* as defined in 312.10 of 40 CFR 312 and have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the target property. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. It should be understood that this signature does not imply certification of the enclosed document, but merely specifies the individual involved in the preparation and review of the data detailed in this report. Appendix E-1 contains the resume of the GTS Environmental Professional responsible for reviewing and issuing this Phase 1 ESA.

A handwritten signature in blue ink, appearing to read "Peter Barrett", written in a cursive style.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Search Results:

<u>Year</u>	<u>Scale</u>	<u>Details</u>	<u>Source</u>
2017	1"=500'	Flight Year: 2017	USDA/NAIP
2013	1"=500'	Flight Year: 2013	USDA/NAIP
2010	1"=500'	Flight Year: 2010	USDA/NAIP

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by GTS Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 5A70-45B0-A57E
PO # 22-19117
Project BURK COLLINS

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 5A70-45B0-A57E

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

GTS Inc. (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 02/28/2022 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
LOWE'S OF SILOAM SPR EPA ID:: ARR000029678	3499 HIGHWAY 412 E	E 0 - 1/8 (0.060 mi.)	A1	8

EXECUTIVE SUMMARY

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 02/28/2022 has revealed that there are 2 RCRA-VSQG sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Click Here:

Environmental Interest/Information System:
 Arkansas Permit Data System (PDS) is a system maintaining data on air quality, mining, tires, solid waste, tank, water and hazardous waste, as well as inspections, invoicing and complaints.
 RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Leak Damage: unknown at this time, some (amount unknown) contaminated soil
Memo: 03-04-04 - METHOD OF DISCOVERY: digging sewer line, hooks 2 pipes, bucket hits rock, sparks occur, ground on fire. probable contaminated soil put on and covered up with plastic, two samples were taken in excavation site, one at 2 feet & one at 10 feet, analysis shows 10 feet one "hot" & 2 feet one not, have not be given copy of analysis as of 26 Apr. 08-10-04 - This started out as an Emergency Responce call form Merrit, when arrived, the fire had went out, did not smell strong odor of gas, but enough time may have passed passed to air out hole. The two pipes the contractor hooked and pulled out was galvanized 2-3' 2-3" diameter galvanized pipes. They came from the area of the dispensers and went toward the highway. The tanks are located behind and to the left (west) of dispensers (left of building). Unsure what lines were that were hooked, unless they were at one time the vent lines or if the original tanks were installed towards the highway (when it was two-lane). Unable to determine were fuel came from. No other facilities located in general area. Behind facility about 200 yards is a sale barn. Plan is now, to visit with Mr. Fullerton (current Owner) on Wednesday the 28th. Facility is not currently registered in his name, and previous owner has outstanding annual fees. 8/10/04 (James Atchley) 08-24-04 - Case file opened with the Technical Branch (James Atchley) 09-16-04 - E-mail opinion from Jennifer Tucker this date designating Ken Fullerton as the Responsible Party for the response. (James Atchley) 11-19-04 - Preliminary Assessment completed which indicates source materials and potential impact to human health and ecological receptors. Level-and-extent investigation requested; work plan by 11/19 (James Atchley). 03-12-09 - Closure report submitted (M Shinn). 04-03-09 - LUST case still open. Second request for site assessment (by RST Enforcement) forwarded to Mr. Fullerton. Response indicating intent to proceed requested by 4/3/09. 08-10-09 - TRUST FUND ELIGIBILITY DENIED. LETTER DATED AUGUST 10, 2009 5/11/10 (M Shinn) 08-10-09 - Third and final request for site assessment forwarded to Responsible Party. Work plan and cost estimate to be submitted by 6/11/10. Copy of ADEQ Access Agreement was attached, to be signed by RP if unable to proceed, to be returned by 6/11/10. (M Shinn) 04-30-10 - Letter from Legal Division giving RP ten days to submit SAWP. 05-11-10 - Final letter to RP requesting submittal of requested SAWP 06-23-10 - Access Agreement forwarded to RST Division by RP, with statement that he will be unable to proceed with corrective action. State Lead Case (Federal LUST Trust) #17059 assigned.(M Shinn) 07-09-10 - Revised Preliminary Assessment completed by Mike Shinn, RST. 09-30-10 - Letter Request for Contractor Services to Terracon - Request for SAWP 11-18-10 - Terracon submits requested SAWP. 12-13-10 - SAWP Approval Letter sent out. 03-09-11 - Environmental Site Assessment Report submitted by Terracon; 03-22-11 - Exposure Assessment completed; No ecological receptors present, no human health exposure pathways, no free product present - recommend case closure following well plugging. 04-04-11 - Letter requesting Well Decommissioning WP sent out. 05-03-11 - Well Closure Workplan Approved. Well Closure Report due from Terracon on June 17, 2011. 06-07-11 - Well Closure Report received. 06-09-11 - NFA Letter sent; case closed. [GLD 8/18/2011 9:17:21 AM].

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 01/25/2022	Source: EPA
Date Data Arrived at EDR: 02/03/2022	Telephone: N/A
Date Made Active in Reports: 02/22/2022	Last EDR Contact: 04/01/2022

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 01/25/2022

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Local Land Records

LIENS 2: CERCLA Lien Information

A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

2901 US HWY 412
SILOAM SPRINGS, AR 72761

TARGET PROPERTY COORDINATES

Latitude (North): 36.183201 - 36° 10' 59.52"
Longitude (West): 94.51044 - 94° 30' 37.58"
Universal Tranverse Mercator: Zone 15
UTM X (Meters): 364175.1
UTM Y (Meters): 4005124.5
Elevation: 1154 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map: 15504652 SILOAM SPRINGS, AR
Version Date: 2020

East Map: 15504642 GALLATIN, AR
Version Date: 2020

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
40001C0075D	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
NOT AVAILABLE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Jay

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 61 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	11 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 1.4 Min: 0.42	Max: Min:
2	11 inches	22 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 1.4 Min: 0.42	Max: Min:
3	22 inches	35 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 1.4 Min: 0.42	Max: Min:
4	53 inches	61 inches	gravelly silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 1.4 Min: 0.42	Max: Min:

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
5	35 inches	53 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 1.4 Min: 0.42	Max: Min:
6	61 inches	79 inches	weathered bedrock	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 1.4 Min: 0.42	Max: Min:

Soil Map ID: 2

Soil Component Name: Taloka

Soil Surface Texture: silt loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 36 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	11 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 0.42 Min: 0.01	Max: 8.4 Min: 5.1

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
2	22 inches	35 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 0.42 Min: 0.01	Max: 8.4 Min: 5.1
3	11 inches	22 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 0.42 Min: 0.01	Max: 8.4 Min: 5.1
4	35 inches	72 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 0.42 Min: 0.01	Max: 8.4 Min: 5.1

Soil Map ID: 3

Soil Component Name: Carytown

Soil Surface Texture: silt loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 15 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 0.42 Min: 0.01	Max: 8.4 Min: 5.6
2	9 inches	18 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 0.42 Min: 0.01	Max: 8.4 Min: 5.6
3	18 inches	79 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 0.42 Min: 0.01	Max: 8.4 Min: 5.6

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.
