

BUNN® Axiom Twin Airpot Brewer

Pre-Installation Checklist

BREWER FEATURES

- Medium volume brewing solution
- Brews directly into to 2.2L & 3L airpots
- Ensures coffee brew quality with cold brew lock out capability
- Hot water faucet
- SplashGuard® funnel deflects hot liquids away from the hand
- Twin brew head system
- For use with Portion Pack sizes:
 - SBUX – 5oz
 - SBC – 2oz
 - TI – 1.75oz
- Required paper filter size: 12.3" x 4.75"
- **Starbucks Machine SKU# 011006169**

SINGLE PHASE ELECTRICAL REQUIREMENTS

Phase	Outlet	Volts	Max Amp Draw	Breaker	Neutral	Ground
1	 L14-30	120/240	26 amps	30 amps	Yes	Yes
BREWING CAPACITIES (approx.):		8oz Cups Per Hour 240	Gallons Per Hour 15			

PLUMBING REQUIREMENTS

Inlet Water Fitting

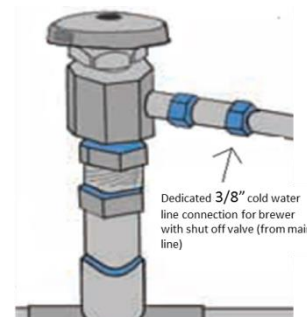

3/8" Male Flare Fitting
(copper or flex)

Maximum Input Pressure

20-90 PSI

Brewer must be connected to a DEDICATED cold water line with a shut off valve. Distance from the brewer must not exceed 5 feet.

Please be aware that some local ordinances require a back flow preventer. Your local plumber should know the most current codes. Starbucks does not supply a back flow preventer.

WATER FILTRATION

To ensure that the coffee brewed by our customers meets Starbucks' quality standards, water filtration is required for each brewer. At the time of installation, a technician will install a water filtration system and initial water filter cartridge for each brewer. Regular changing of the filter is the responsibility of the customer.

BUNN® Axiom Twin Airpot Brewer

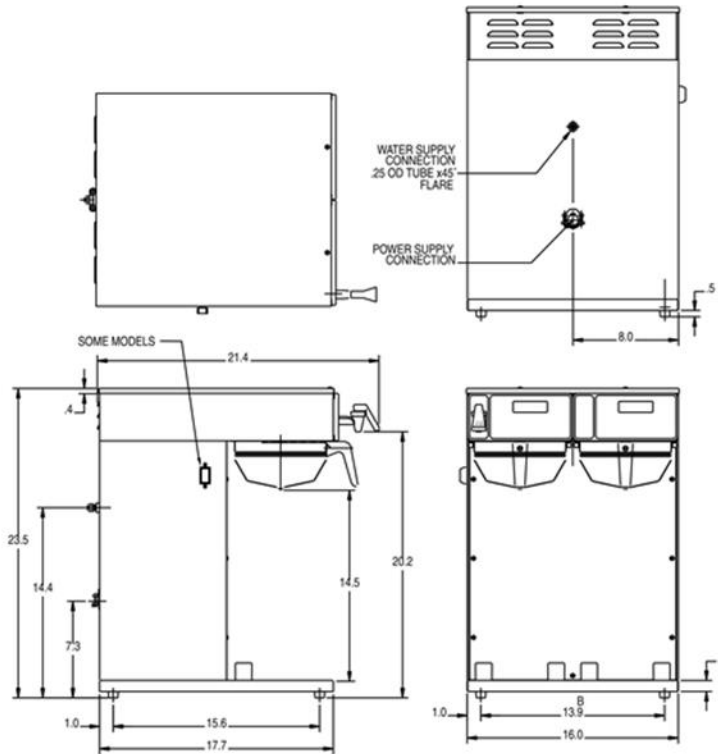

Pre-Installation Checklist

MACHINE DIMENSION AND WEIGHT SPECIFICATION

<u>Machine Height</u>	<u>Machine Width</u>	<u>Machine Depth</u>	<u>Machine Weight</u>
23.5"	16"	17.7"	50lbs

Installers are not permitted to remove cabinetry/shelving or alter customer property in any way.

SITE READINESS COMMITMENT

Customer agrees to have the site prepared according to the specifications indicated above, by the agreed upon installation date. Starbucks is responsible only for connecting the brewers to existing water lines and existing power. Customer is responsible for drilling all countertop, wall or cabinet holes needed for accessing power and/or water.

Customer will incur a non-reimbursable charges of \$300 per machine if site is not ready on date agreed upon or if technician is delayed due to lack of proper site requirements. Customer may postpone installation up to 48 business hours prior to scheduled service. Postponement may cause rescheduling delays up to 3 weeks.

Coffee Art Plus TouchIT

Pre-Installation Checklist

schaerer
swiss coffee competence

THIS FORM MUST BE COMPLETED AND RETURNED TO YOUR NESTLE STARBUCKS COFFEE SALES REPRESENTATIVE BEFORE INSTALLATION WILL BE SCHEDULED

- The installation visit includes: machine set-up, calibration and customer training for any number of employees
- Please contact your Nestle Starbucks Coffee representative with any installation questions or for additional information

ELECTRICAL REQUIREMENTS

220 VOLT, 30 AMP DEDICATED CIRCUIT IS REQUIRED; 2-wire plus ground (L1, L2 & G)

<u>Recommended Outlet</u>	<u>Volts</u>	<u>Max Amp Draw</u>	<u>Breaker</u>
 NEMA L6-30R	220	24 amps	30 amps

BREWING CAPACITIES (approx.): 70-80 cappuccinos/lattes per hour

PLUMBING REQUIREMENTS

Inlet Water Fitting

3/8" Compression Fitting
(copper or flex)

Maximum Input Pressure

30-60 PSI

Brewer must be connected to a DEDICATED cold water line with a shut off valve.
Distance from the brewer must not exceed 5 feet.

Please be aware that some local ordinances require a back flow preventer.
Your local plumber should know the most current codes. Starbucks does not supply a back flow preventer.

WATER FILTRATION

Adequate space available for the installation of the SEB Professional water filtration cartridge and filter head. (See dimensions on back) Filter must be installed on secure mounting point and accessible for service. The filter may be installed horizontally or vertically.. Regular changing of the filter is the responsibility of the customer.

DRAINAGE REQUIREMENTS

The Coffee Art Plus Touch is supplied with a waste water hose that must be routed to a drain. The supplied drain line may not be substituted. The site drain must be located within 36-inches (3ft) of the machine.

COUNTER REQUIREMENTS

To properly support the Coffee Art Plus Touch, a sturdy level surface that can support 150 lbs. must be used. Required available counter top footprint is: 17" (W) x 22" (D) x 28" (H).

A hole in the counter or path must be available for routing water supply line, drain line, and electrical cord from the machine to the site connections. Clearance of 2-inches is required around the sides of the machine and clearance of 3-inches is required in the back of the machine

CUSTOMER REQUIREMENTS

To ensure a timely and successful machine installation, the following items must be available at the location prior to the scheduled installation date/time:

- Beverage manager or location manager
- Espresso beans – fresh, whole beans approved for espresso. Hopper capacity is 2.2lbs. Each
- Fresh cold milk

** Installers are not permitted to remove cabinetry/shelving or alter customer property in any way.

INSTALLATION SITE INFORMATION – REQUIRED

Installation Site Name		Site Address (full address required)	
Site Contact		Main Site Contact Phone #	
Main Site Contact Email		Main Site Contact Fax #	

All plumbing and electrical hook-ups must be completed and this form returned before scheduling installation. If installation cannot be completed due to site condition (i.e. no power, water, drain hook-up or product for calibration) a penalty charge of **\$225 or the incurred install cost, whichever is greater**, may be assessed. This penalty will be assessed for each subsequent visit upon which the site is not ready for installation. In the event there is any standby time spent by a technician on site awaiting completion of site conditions, additional charges will apply.

TO CONFIRM THAT YOUR SITE IS READY FOR INSTALLATION, PLEASE RETURN THIS COMPLETED FORM TO:

THE QUIET ONE®

Engineered to provide dramatic sound reduction, world class reliability, unparalleled speed of service and a perfect blend every time.

INNOVATIVE DESIGN

Up to 4 Times Quieter Than the Competition

Innovative vibration dampening technology creates Vitamix quality drinks in a more enjoyable customer atmosphere.

Magnetically Secured Floating Sound Enclosure

Dramatically easier to clean and disassemble. No screws to damage the enclosure. No parts to lose.

Ultimate Blending Flexibility and Optimization

Variable speed control and automatic shut-off provide flexibility in creating endless recipes. The 4 program buttons (capability for 6) with 34 optimized programs in memory provide operators with easy, consistent drinks every time. Custom blending programs can easily be created for signature drinks.

Improved Speed of Service

The Advance® container design reduces blend and pour time for faster customer service.

Designed for High Performance and Durability

Air management and powerful ≈ 3 peak output horsepower motor reduces noise, improves reliability and reduces down time.

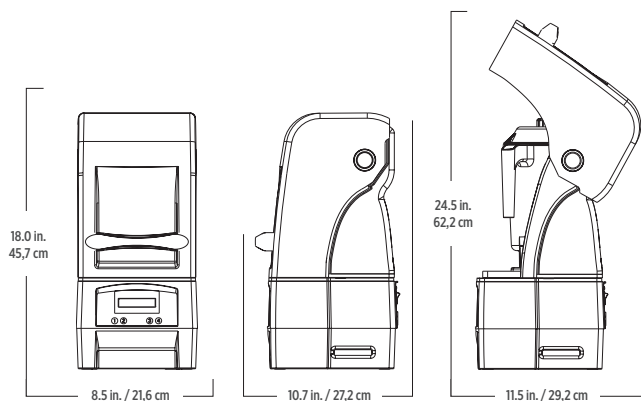

On Counter Blender

Starbucks: #011074330

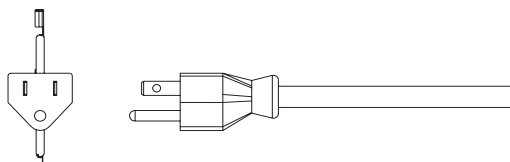

Motor: ≈ 3 peak output horsepower motor
 Electrical: 120 V, 50/60 Hz, 15 A, Single Phase
