<b>10965902</b>	General	Air Barrier Conformance		Sections 3.6.4 e, 3.3.5.1.7 and 3.3.5.8.2
-----------------	---------	-------------------------	--	---

Comment Classification: **Controlled Unclassified Information (CUI)**

Significant changes in the 2012 International Building Code (IBC), 2012 International Energy Conservation Code (IECC), and ASHRAE 90.1-2010 now require the design of buildings to not only have increased thermal efficiency with the use of continued insulation, but also require the use of a complete air barrier system. All buildings are constructed prior to that new requirement. The RFP requires in section 3.3.5.1.7 to demonstrate air barrier conformance using test procedures per U.S. Army Corps of Engineers Air Leakage Test Protocol for Building Envelopes.

The requirement in section 3.3.5.8.2 stipulates to meet or exceed the requirements of ASHRAE 90.1 for energy performance and comply with UFC 3-101-01 requirements for all exterior wall construction assemblies. This renovation project requires very little exterior work. Please clarify if and how a blower testing that maybe required can pass under these circumstances dealing with unknown exterior assemblies to remain?

On: Aug 23 2024.

**Government Response.** . Section 3.3.5.1.7 refers to roof insulation, all of which is new. Section 3.3.5.8.2 specifically mentions it applies to the B216 new addition only. Compliance with required codes and standards is the responsibility of the designer of record and testing is means and methods for the contractor. On: Aug 27 2024

Current Request Status: **Request Closed**

<b>10966259</b>	General	RFP	TAB C: FACTOR 2 - Design Technical	
-----------------	---------	-----	------------------------------------	--

Comment Classification: **Controlled Unclassified Information (CUI)**

The current page limit for TAB C: FACTOR 2 - Design Technical: is NTE four double-sided pages. The offeror must describe their General approach, processes and procedures, phasing, means & methods for minimal laydown, RFI and submittal requirements, quality control process, and provide an organizational chart. The amount of information we must provide, plus a 1" margin and a minimum 12-point font requirement, would minimize the detail the offer could provide.

Would the government consider extending the page limit to NTE 8 double-sided pages?

On: Aug 24 2024.

**Government Response.** . RFP TAB C: FACTOR 2 - Design Technical will be updated via amendment to eight double-sided pages. On: Aug 27 2024

Current Request Status: **Request Closed**

**Information for this report is procurement sensitive.**

<b>10966321</b>	Architectural	NA	NA	Appendix C Room Data Sheets

<b>10973766</b>	Architectural	NA	NA	3.3.5.1.2 and 3.3.2
-----------------	---------------	----	----	---------------------

Comment Classification: **Controlled Unclassified Information (CUI)**

Section 3.3.2.5. a. notes that much of the (218) facility east of gridline A remains in its current configuration. Item b notes to demolish the existing roof and metal wall panels and to reference attachment B concept drawings for locations. Page AD101 of the concept drawings show the exterior walls east of column line A to be existing elements but no information of the roof demolition is included. Many RFI answers point to section 3.3.5.1.2 which notes to replace roofs in their entirety. Please confirm the high-sloped roof west of column line A is to be replaced.

<b>10973769</b>	Architectural	NA	NA	3.3.1.5
-----------------	---------------	----	----	---------

Comment Classification: **Controlled Unclassified Information (CUI)**

Section 3.3.1.5 a. notes to provide a new exterior envelope consisting of walls and roof to align with the existing low-sloped PEMB. The roof east of column line A on building 218 does not currently exist as a low-sloped roof. Please confirm that all existing roofing, decking, and structural roof framing needs to be demolished in its entirety to provide a new roof system at a low sloped pitch east of column line A.

<b>10973808</b>	Electrical	NA	NA	RFP 3.8.6.1 and 3.8.6.2
-----------------	------------	----	----	-------------------------

Comment Classification: **Controlled Unclassified Information (CUI)**

The RFP indicates that electrical distribution for Bldg 202 is to remain. The RFP also indicates that computer loads are to be fed from K4 transformers. There are no electrical as-builts provided for Bldg 202. Please confirm if we will need to provide a new K4 transformer and panel for Bldg 202 or if computer loads can be fed from an existing panel.

<b>10973817</b>	Electrical	NA	NA	NA
-----------------	------------	----	----	----

Comment Classification: **Controlled Unclassified Information (CUI)**

The concept plans for building 216 indicate 3 secure areas:  
 A group of offices that are to be UFC 4-010-05 SAPF/F-35FRD  
 B216: A group of offices that are to be US Secret Clearance access DoDM 5200.01 VOL3  
 A single VIPER EP SIM room to be US Secret Clearance access DoDM 5200.01 VOL3  
 Please confirm if the groups of rooms should each have (2) 208/120V, 3-phase, 4W panels to serve the loads in the secure area (one regular panel, and one computer panel [K4]), allowing the panel feeders to have EMI filters.

Please confirm if the VIPER EP SIM room should have branch circuit EMI filters for the branch circuits serving that room.

Comment Classification: **Controlled Unclassified Information (CUI)**

New SSMR System indicates all panels to be formed at the manufacturing plant. Note that almost all standard standing seam roofing panels are rolled on site and plant rolled panels are reserved for custom rolls. Requiring factory rolled panels will incur a

premium for panels plus additional shipping costs, please confirm this is the requested direction.

<b>10973829</b>	Architectural	NA	NA	Bid Inquiry 10965941
-----------------	---------------	----	----	----------------------

Comment Classification: **Controlled Unclassified Information (CUI)**

The response to question 10965941 says to remove and replace all the existing roofs except 202. The question was asked to determine if the Government actually meant the older, low slope and the newer PEMB roof over the 4,000 sft addition. The newer roof appears to be in good shape. Please reconfirm the newer roof is to be removed and replaced.

We respectfully request the government adjust the due date to Tuesday, 10 September. Historically, putting together a final bid price with subcontractors over the weekend is very challenging and often leads to higher costs, especially if/when subs are not responsive on the weekend when responding to any final questions/concerns with their pricing. Thank you for the District's consideration."
