1.2 General Description

The F-35 Special Access Program Facility is a new construction building located at Ebbing Air National Guard Base in Fort Smith, Arkansas. The new facility will house pilot lockers, AFE maintenance, security, administrative, operations, and mission planning facilities needed to train Foreign Military Sales (FMS) F-35 pilots and support the FMS program. The building will have the capacity to support up to three countries training simultaneously.

The objective for the interior is to design an environment that is attractive and safe, while responsive to the end users' needs and functions. The interiors will promote an appropriate professional image that supports the mission.

1.3 Furniture, Fixtures & Equipment - FFE

The floor plan for the building is divided into a non-secure area and a secure block. The non-secure area is comprised of: student areas, administrative offices, security and scheduling, pilot locker rooms, conference rooms, and maintenance areas. Break rooms and a nursing mothers' room provide spaces for rest and recharging throughout the day. The secure block is comprised of three secure vaults. Each vault contains briefing rooms, mission planning, ALIS/ODIN and a server room.

The criteria for the FFE benefits both the facility requirements and user needs from a facility management and health perspective. The facility requires furnishings that respond to the physical demands of constant utilization within a training environment. To achieve the requirements for the facility, the furnishings must be durable, easy to maintain, have limited parts and pieces to manage, and have universal modularity.

Of equal importance to the function of the furnishings is the ergonomic support and features that support a healthy work environment for the users. The furnishings size and adjustability features will accommodate a minimum of 95% of the facility population size. Other healthy and ergonomic furniture features include:

- Seating for all users with easily adjustable mechanisms for height, arms, and back; breathable fabric; and seat pan front edges that will not cut off circulation while seated.
- Selected furnishings from manufacturers that utilize green manufacturing processes and produce products that are Green Guard Certified with recycled content materials. When possible, furnishings will be provided that achieve the “Cradle to Cradle” environmental status to reduce future landfill use.
- Desk and workstations with height-adjustable tables are included to encourage standing and more movement while working throughout the day.

1.4 Interior Furnishings Styles & Types

The furniture style for the building shall be a transitional style with design lines that reflect the F-35 aircraft, squadron colors, and simple forms that function efficiently. Hierarchies of furnishings have been implemented through finishes and trim detailing with the administrative offices, conference rooms, lobby and break rooms having the highest design aesthetic, while including durability and function. Furnishings and interior architecture in the Vault spaces will prioritize durability and functionality, while being cohesive with the overall building design.

1.5 Space Planning & Furnishings Standards

The interior square footage of useable space was allocated based on Facility Requirements Standards AFMAN 32-1084, along with needs and functions confirmed from end-user interviews and the Lockheed Martin F-35 Lightning II Facilities Requirements Document (FRD). Desk standards and interior space plans were designed to provide staff coordination and integration amongst teams and support the functions within the individual areas of the facility. Reference the Design Analysis Appendixes for a full list of square footages per room.

The furnishings standards for the F-35 Special Access Program Facility were developed and are illustrated in the FFE Package. They are summarized in the following table.

1.5.1 Space/Furniture Standards Assignment

Square Footage:	Furniture Standard/Style:	Assignment:
Desks:		
48 SF Desk	D1: 8'x6' U-Shape Private Office Desk, Transitional Style – Wood, Metal, and Glass	Private Office – DO Office, Squadron Commander Office, IMSO Office, SNR offices, IP offices and Flight Medical Office
36 SF Desk	D2: 6'x6' L-Shape Private Office Desk, Transitional Style – Wood, Metal, and Glass	Private Offices – SARM, Standards and Eval, NCOIC office, and APC/RA, Command Suite
104 SF Desk	D4: 8'x13' U-Shape Private Office Desk, Transitional Style – Wood, Metal, and Glass	Open Office –Command Suite

80 SF Desk	D5: 8'x10' U-Shape Private Office Desk, Transitional Style – Wood, Metal, and Glass	Open Office – Command Suite
Workstations:		
36 SF Workstation	WS1: 6'x6' L-shaped Transitional Style Laminate and Fabric Panel-Based Workstation	Open Offices – Scheduling & Training, SARM Admin
18 SF Workstation	WS2-A & WS2-B: 2'6"x6' Straight Transitional Style Laminate and Fabric Panel-Based Workstation	Open Offices – Security, ALIS/ODIN, Student Workstations
12 SF Workstation	WS3: 2'6"x4' Straight Transitional Style Laminate and Fabric Panel-Based Workstation	Open Offices – Security, ALIS/ODIN, Student Workstations
12 SF Workstation	WS4: 2'6"x12' Straight Transitional Style Laminate and Metal Panel-Based Workstation (for 3)	Open Offices – Vault Mission Planning Workstations
12 SF Workstation	WS5: 2'6"x20' Straight Transitional Style Laminate and Metal Panel-Based Workstation (for 5)	Open Offices – Vault Mission Planning Workstations

In addition to the personal workspaces listed previously, the building will provide furnishings to support the activities in the building as follows:

- Entry Lobby – Soft seating and benches along with a security/reception desk (MILCON) with task chairs.
- Break Rooms – Tables and seating, food preparation counter with sink (MILCON), microwave, refrigerator/freezer, coffee maker, clock, and waste and recycling receptacles.
- Wellness Room (Mothers Room) – Reclining chair, side table, counter with sink (MILCON), undercounter refrigerator, microwave, and waste and recycling receptacles.
- Conference Rooms – Wood conference tables, task seating around the conference tables, guest seating along the perimeters, flat panel displays (AV), clocks and waste and recycling receptacles.
- Administrative Spaces – Task seating, guest seating, storage, markerboards, personal waste and recycling receptacles, monitor arms and printers/copiers (GFGI) and shredders (GFGI).
- Briefing Rooms – Laminate conference tables, task seating, guest seating, flat panel displays (AV), clocks and waste and recycling receptacles, markerboards.

- Large Briefing Room – Fixed seating (MILCON)

1.6 Furnishings Description

The criterion for the interior furnishings (FFE) includes providing product types and layouts that are designed for the maximum space efficiency to accommodate teaming and solitary work efforts. The furnishings are value oriented with ergonomic attributes, integrated technology, modular construction and finishes proven in longevity.

Furnishings to be provided include: wood desks with returns, credenzas and overhead storage; metal and laminate panel-based workstations; task and guest seating; file and cabinet storage; conference tables and seating; lounge seating; café style tables and chairs; waste and recycling receptacles; markerboards; refrigerators/freezers, microwaves, coffee makers, washing and drying machines. Wall-mounted flat panel displays will be in a separate AV package.

Desk and workstation furniture will have a modular construction with integrated technology to accommodate data and electrical requirements. Copier/printers (GFGI) will be located where space allows in open offices and shared offices. Overhead storage in the desks and workstations will provide easy access to daily reference materials, as well as provide task lighting onto the work surface to avoid eye strain. Panel heights between workstations will allow for collaboration and light filtration. Frosted glass panels will be mounted on workstation panels in large open office settings.

Conference and Briefing rooms will have integrated technology for power and data hook ups, with flat panel displays (AV package) and large markerboards. The conference rooms shall have wood-look furnishings in a transitional style. All table seating in the conference rooms shall have casters, state of the art ergonomic properties and scaled to the size and use of the room. Guest seating shall be provided at the perimeter walls in large briefing rooms.

There is a Breakroom conveniently located in the facility with dining seating to support relaxation and comradery.

1.7 Furnishings Analysis

For each product listed in the specifications, two or three equivalent products/manufacturers shall be considered. Selection will vary for the following reasons: preferred by user, lowest cost, best functional solution and best ergonomic solution selected by user.
