JOB NAME	UAMS Center for Animal Models of Infection & Disease
LOCATION	Little Rock, AR
ENGINEER	James R. Beecher
CONTRACTOR	Middleton Inc.
DATE	3/26/2025
SUBMITTED BY	Chris Atwood

DBLT4W Secd Lint Trap

Item #: 46000

Description

Clothes dryer lint is combustible. Given a right condition, it can self-ignite. The lint trap DBLT 4W installed on the exhaust duct helps reduce the risk of fire.

- Reduces lint accumulation in the ductwork and dryer vent
- Minimizes the risk of a dryer fire
- Suitable for a 4" duct
- Not intended to use without a DEDPV or booster fan

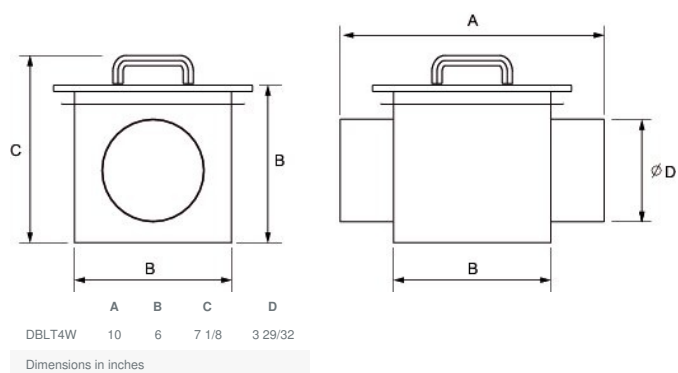

The lint trap box is equipped with a screen that filters the air that feeds into the dryer exhaust fan. The screen catches any airborne lint in the ductwork that isn't caught by the dryer's lint...
