Features

FAST-N-LOCK

Centoco's new patented FAST-N-LOCK Mounting System takes the guessing out when tightening the hardware. The specially designed fasteners "click" when the appropriate torque is reached. This feature largely reduces the chance of getting call backs from customers for seats that have become loose over time.

Commercial Hinge

Includes commercial grade hinges. One piece solid metal hinge pin and bolt over molded with plastic.

Dimensions shown are nominal and may vary within a range of tolerance. Product specifications are subject to change without notice.

ECAST products are intended for installation where state laws and local codes mandate lead content levels or in any location where lead content is a concern.

Architect/Engineer Specification

Chicago Faucets No. 420-T41E2805ABCP, Sink Faucet for hot and cold water, single lever, deck-mounted with 4" fixed centers, chrome plated. Rigid, cast brass spout, 4-5/8" center-to-center. 0.5 GPM (1.9 L/min) vandal-proof, pressure compensating, non-aerating, laminar spray outlet. Ceramic mixing cartridge, includes thermostatic scald protection. Cartridge includes Integral inlet check valves to protect against cross-flow, 1/2" NPSM supply inlets for 3/8" or 1/2" flexible riser. ECAST® construction with less than 0.25% lead content by weighted average. This product meets ADA ANSI/ICC A117.1 requirements and is tested and certified to industry standards: ASME A112.18.1/CSA B125.1, ASSE 1070/ASME A112.1070/CSA B125.70, Certified to NSF/ANSI 61, Section 9, California Health and Safety Code 116875 (AB1953-2006), Vermont Bill S.152, and NSF/ANSI 372 Low Lead Content.

Operation and Maintenance

Installation should be in accordance with local plumbing codes. Flush all pipes thoroughly before installation. After installation, remove spout outlet or flow control and flush faucet thoroughly to clear any debris. Care should be taken when cleaning the product. Do not use abrasive cleaners, chemicals or solvents as they can result in surface damage. Use mild soap and warm water for cleaning and protecting the life of Chicago Faucet products. For specific operation and maintenance refer to the installation instructions and repair parts documents that are located at www.chicagofaucets.com.

Chicago Faucets, member of the Geberit Group, is the leading brand of commercial faucets and fittings in the United States, offering a complete range of products for schools, laboratories, hospitals, office buildings, food service, airports and sport facilities. Call 1.800.TECTRUE or 1.847.803.5000 Option 1 for installation or other technical assistance.

WF2803, WF2804, WF2805, WF2808 Bradstone® Classic Washfountains

- Pre-assembled bowl and pedestal
- Available in 54" or 36" diameter semi-circular or circular bowls
- 9" deep bowl, designed for heavy-duty hand washing
- Reliable foot, air, or infrared activations, or TouchTime® mechanical metering

Specifications

Size and Capacity

Semi-circular models accommodate up to 3 users (36" models) or 4 users (54" models) at a time. Circular models accommodate up to 5 users (36" models) or 8 users (54" models) at a time. The Classic Sprayhead (non-sectional) is controlled by a foot rail, air activated pushbutton, an infrared sensor, or an electronic pushbutton or piezo switch. The washfountain bowls, pedestals, and valve sets are completely assembled. Only the support column and connections to the valve set and drain require assembly. The operating range is 20-80 psi. Flow rate controlled by volume control valve.

Construction

Bradstone®: An extremely durable plastic material made of reinforced thermosetting polyester resins and fade-resistant pigments.

Pedestals: Constructed of die-formed legs, upper braces, scuff bases and panels; legs are zinc chromate plated 14 gauge steel; upper braces are 16 gauge galvanized steel; and scuff bases are 300 series stainless steel with a #4 finish. Bradstone models have tapered, vacuum-formed plastic access panels in the color gray.

Standard Equipment

Valves and Fittings

In addition to the bowl and pedestal assembly, the following valves and fittings are standard: sprayhead with stainless steel support tube and bowl gasket; spud with domed strainer; sprayhead supply line; manual mixing valve; volume control valve; and (2) stop, strainer, and check valves.

Activation Controls

Foot

Each press of the foot rail mechanically actuates a hold-open valve, with slow closing upon release of foot pressure. Foot rail activates a flow of tempered water at a rate of 0.50 gpm (1.9 Lpm) for WF2803; 1.0 gpm (3.8 Lpm) for WF2804; 0.75 gpm (2.8 Lpm) for WF2805; or 1.0 gpm (3.8 Lpm) for WF2808 from the classic non-sectional sprayhead.

Air

Each pushbutton pneumatically actuates a non-hold-open, air metering, single-temperature valve with field adjustable timing from 0–45 seconds. Factory preset at 11 seconds. Each pushbutton activates a flow of tempered water from the classic non-sectional sprayhead. Pushbutton requires less than five pounds of pressure.

Infrared

Hands placed within the bowl are detected by an infrared sensor module which activates a flow of tempered water at a rate of 0.75 gpm (2.8 Lpm) for WF2803; 1.25 gpm (4.7 Lpm) for WF2804; 0.75 gpm (2.8 Lpm) for WF2805; or 1.0 gpm (3.8 Lpm) for WF2808 from the classic non-sectional sprayhead. Shut-off is automatic after hands are removed from the detection area. The infrared sensor uses a conical-shaped transmitting beam, having a detection area adapted to, but not exceeding, the bowl perimeter. The adaptive infrared sensor automatically adapts to the bowl after power is turned on. The infrared sensor is not affected by varying color tones or darkness. Direct sunlight or bright washroom lights will not activate the system. Infrared models also include solenoid valves and a 12V plug-in adapter as standard equipment:

- Solenoid – 12VDC, 3/4" NPT. Few moving parts, and resistant to most chemicals, minerals, and impurities often present in municipal water supplies.
- Low-Voltage UL/CSA listed 120VAC/12VDC plug-in adapter. Plugs into a standard GFCI protected electrical outlet. Location of transformer per local electrical code.

WF2804
Optional Equipment Shown

TouchTime® Mechanical Metering

Each low-voltage, mechanical pushbutton or piezo switch actuates a non-hold-open, slow-closing, anti-hammer solenoid valve that is timed from an electronic potted assembly. Each pushbutton activates a flow of tempered water at a rate of 0.15 gpc (0.57 Lpc) for WF2803; 0.25 gpc (0.95 Lpc) for WF2804; 0.15 gpc (0.57 Lpc) for WF2805; or 0.25 gpc (0.95 Lpc) for WF2808 from the classic non-sectional sprayhead. TouchTime controls water flow at all stations through the use of solid state, digital circuitry. Timing is factory set at 11 second run time but is field adjustable to pre-set timeout periods and optional auto-flush function will activate water flow for a period of 60 seconds any time there has been no activation within the past 24 hours. Pushbutton and piezo switch requires less than five pounds of pressure.

In keeping with our policy of continuing product improvement, Elkay reserves the right to change product specifications without notice. When making a comparison of other producers' offerings, be certain these features are not overlooked.

IMPORTANT! INSTALLER PLEASE NOTE :

This water cooler has been designed and built to provide water to the user which has not been altered by materials in the cooler waterways. The grounding of electrical equipment such as telephone, computer, etc. to water lines is a common procedure. The grounding may be in the building but may also occur away from the building. This grounding can cause electrical feedback into a water cooler creating an electrolysis which creates a metallic taste or causes an increase in the metal content of the water. This condition is avoidable by installing the cooler using the proper materials as shown below.

NOTICE

This water cooler must be connected to the water supply using a dielectric coupling. The cooler is furnished with a non-metallic strainer which meets this requirement. The drain trap which is provided by the installer should also be plastic to completely isolate the cooler from the building plumbing system.

Splash Catcher® **BACK PANELS**

Avoid complaints about damaged
or deteriorating wallboard.

Add "BP" to your mop sink specifications.

STERN-WILLIAMS
Stainless Steel panels
cover the critical
12 inches of wallboard
just above the mop sink.

The unfinished wallboard being used
in maintenance closets today
cannot withstand the conditions
that exist there. But you can
prevent problems before they begin.

TO SPECIFY:

Add suffix "BP" to the Stern-Williams
model number, along with the number of
walls. For example, Corlow corner model
with front drop is "SBC-1700-BP-2"

Panel material is type 304, 20-gauge
Stainless Steel, meeting Commercial
Standard CS-243-62.

1. Channel water into the mop sink, protecting the face of the wallboard against splashing, and protecting the raw lower edge against seepage.
2. Cover and protect the seam-taped corners, preventing loosening and curling of seam tape.
3. Protect wallboard against the impact of equipment and the carelessness of maintenance workers.

Stern-Williams is your most complete source for mop sinks and accessories.

We produce mop sinks. We help you avoid problems.

- Photo 1: Grab Bars: Factory-installed 1.50-inch diameter, concealed attachment, 18 gauge, #304 brushed stainless steel grab bars. Concealed attachment design provides tamper-resistance and minimizes debris collection areas at contact points, compared to common exposed flange bar designs, without compromising bar attachment integrity. (Reinforced areas include a structural core material encapsulated in FRP composite.)
- Photo 2: Shower Bench Seat: Factory-installed shower bench seat with non-porous, high-pressure laminate upper and lower surfaces, fused to high-density phenolic core. The seat area secures to an 18 gauge, #304 stainless steel framework, and easily pivots upward to store along the wall without supplemental fasteners. Heavy-duty wall (hinge) bracket design eliminates supplemental legs and is formed from 10 gauge, #304 brushed stainless steel. (Reinforced area includes a structural core material encapsulated in FRP composite.)
- Photo 3: Shower Curtain Rod: Factory-installed 1.00-inch diameter, concealed attachment, 18 gauge, stainless steel shower curtain rod with polished finished.
- Photo 4: Shower Curtain: White, 150 denier fabric, bottom weighted shower curtain with integrated rings.

Available Factory Installed Packages (model available without any component or reinforcement packages)

Component Packages:

- ANS17 package code: 2-wall, 3-bar package with phenolic folding RH or LH seat & shower rod, based on ANSI-2017

MI-GARD®

FLOOR DRAIN TRAP SEAL

Specification: MIFAB® MI-GARD® Series inline floor drain trap seal with UV resistant ABS plastic frame, silicon rubber sealing flapper and four flexible sealing ribs. Tested and certified to the ASSE 1072 Standard and listed with IAPMO and I.P.C. Specify connection size (1 1/2", 2", 3", 3 1/2", 4" or 6"). 10 year warranty is included.

Function: Used in the outlet connections of floor drain bodies, or the inside of floor drain strainers to seal the opening to prevent odors, sewer gases, and insects from entering up through the floor drain grate. The MI-GARD®'s four flexible silicone sealing ribs ensure easy installation into openings that have variations in size. The MI-GARD® will open to allow drainage and close when there is no water flow. MI-GARD can be used independent or in conjunction with trap seal primers for added protection against sewer gases and insects entering up through the floor drain grate. MI-GARD is not designed to substitute the trap seal primers.

MI-GARD®

FLOOR DRAIN TRAP SEAL

Specification: MIFAB® MI-GARD® Series inline floor drain trap seal with UV resistant ABS plastic frame, silicon rubber sealing flapper and four flexible sealing ribs. Tested and certified to the ASSE 1072 Standard and listed with IAPMO and I.P.C. Specify connection size (1 1/2", 2", 3", 3 1/2", 4" or 6"). 10 year warranty is included.

Function: Used in the outlet connections of floor drain bodies, or the inside of floor drain strainers to seal the opening to prevent odors, sewer gases, and insects from entering up through the floor drain grate. The MI-GARD®'s four flexible silicone sealing ribs ensure easy installation into openings that have variations in size. The MI-GARD® will open to allow drainage and close when there is no water flow. MI-GARD can be used independent or in conjunction with trap seal primers for added protection against sewer gases and insects entering up through the floor drain grate. MI-GARD is not designed to substitute the trap seal primers.
