

Safety and Quality Control Personnel Requirements:

SAFETY PROFESSIONAL REQUIREMENTS: All ranges above 10 personnel will require the specified number of full-time safety personnel as shown below with no other management responsibilities:

- (a) Trade Personnel Range 10-25, 1 Safety Professionals
- (b) Trade Personnel Range 26-75, 2 Safety Professionals
- (c) Trade Personnel Range 76-200, 3 Safety Professionals
- (d) Trade Personnel Range 201 +, 4 Safety Professionals

Trade Partner/Subcontractor Safety Professionals are required to coordinate with the Contractor's Safety Professionals on a daily basis. Daily coordination shall include daily Safety Huddles with the collective group of Safety Professionals. Trade Partner/Subcontractor Safety Professionals shall provide daily updates/reports at the scheduled Safety Huddles. Trade Partner/Subcontractor Safety Professionals shall support the safety focuses and enforce the Project Safety Plan as it pertains to their employees. The intent is to provide a heightened level of safety on site where Safety Professionals collaborate so there is consistency amongst all Safety Professionals, shared "Near Hits", shared training opportunities, communication of hazards and mitigation measures, unity in messaging and safety focus areas. The intent is not to manage individual Trade Partner/Subcontractor's Safety Programs or manage Partner/Subcontractor's personnel and each Trade Partner/Subcontractor remains responsible for the details of their work and the safety of their employees.
